

## SOLO PRODUCT FACT SHEET

### The Arch Suspender™

#### **Description:**

The Richie Arch Suspender™ is a new, patent pending invention to provide a powerful adjustable control over the midtarsal joint of the human foot. The medial arch suspender stabilizes the talonavicular joint while the lateral arch suspender stabilizes the calcaneal-cuboid joint. The combined use of the medial and the lateral arch suspender provides an Arch Hammock™ for comprehensive control and stability of the entire rearfoot-ankle complex.

#### **INDICATIONS:**

##### Medial:

- Stage II or III PTTD with sublexed T-N jointly

##### Lateral:

- Peroneal tendinopathy
- Fixed various deformity of hindfoot/ankle

#### **BENEFITS:**

- Arch suspender fully adjustable
- Transverse and frontal plane control of foot
- Control of ankle inversion or eversion
